

Binary: A Novel

When a nerve gas shipment goes missing, the nation's fate hangs in the balance. John Graves is a State Department intelligence agent who made his name on the front lines of the Cold War. Since then, he has been transferred to domestic work, and his love for the job has withered away. All that sustains him is the hunt for John Wright, a crazed millionaire who is about to unleash the greatest domestic threat Graves's agency has ever faced. When seven mobsters rob a U.S. Army train in the middle of the Utah desert and make off with half a ton of the deadliest nerve gas known to man, Graves believes that Wright is involved. His plan: to detonate the weapon in San Diego during the Republican National Convention, an attack that would kill more than one million Americans, including the president. Stopping Wright will take more than police work. It is a chess match between agent and madman, and for Graves, checkmate is not an option. This ebook features an illustrated biography of Michael Crichton including rare images from the author's estate.
