

ANNE SWIFT: Making the Molecular Biological Detective: The Biography of Anne Douglas Swift, FBI Scientist

Anne Douglas came from a nice family with a slightly mysterious background. When she is unceremoniously dumped at an all girl 6-12 school a hundred miles from home, she is both hurt and yet determined to make the most of it. If nothing else, Anne is smart and a survivor. What she discovers is a love and great aptitude for science and begins to make the most of things. What she cannot know is that there are forces people far in the background who take an interest in this bright young girl and set out to make her life at school and afterwards one filled with the kind of scientific adventures she could never even dream of. But, there is more in this tale of how Anne Douglas grew up to meet and marry the young Damon Swift, the grandson of famous early 1900s inventor and scientist Tom Swift. Here is the back story of how Anne ended up becoming one of the FBI's top scientists in her spare time while raising their two children, Tom and Sandy, and how she started keeping her other life a deep secret from everyone. This biography includes her very first assignment with the FBI and how she finally figures out what had been going on and shaping her life for more than a dozen years. Finally, Anne Swift, Molecular Biological Detectives story is told. Also available and published in a trio of novella collections, the original Anne Swift stories: Anne Swift and the Microbial Murder Mess Anne Swift and the Nasty Nuclear Nodules Anne Swift and Scary Scroungy Scrofula Anne Swift and the Deadly Dino DNA Anne Swift and the Malicious Meteor Mayhem Anne Swift and the Incendiary Insect Infestation Anne Swift and the Alien Anticoagulant Anomaly Anne Swift: Interview With a MoBiDet Anne Swift and the Pernicious Parasite Pandemic
