

THE OTHER SIDE OF DREAMS

Take two young people: - John in England and Amy in California. Take a common factor: - both recognised that they had been born into the wrong gender. As they grow up, they realise that their bodies are in imminent danger of changing into something neither wants. Result: - Two very unhappy souls. Their dreams are the only place they can find solace. Then they start to dream of each other, and to get a little glimpse of the others life. Over time they learn how to crossover at will and not just when asleep. They start to leave childhood behind as puberty beacons. The lines become blurred, who is where? Solution: - One of them takes the bold step and suggests they try to live each others lives. Will it work?
