

## Ballistic Force

A raid on Korean gang activity in California takes a dangerous turn into a world crisis, when Mack Bolan uncovers intelligence involving North Korea's nuclear weapons program. A group of high-level defectors from the Project Kanggye Nuclear Team scientists with first-hand knowledge of North Korea's missile strike capabilities is being systematically abducted back to their homeland. Unable to stop the kidnapers before they complete their mission, Bolan and elite Stony Man team members track the enemy to the Changchun Mountains, where North Korea's despotic leader is about to achieve pre-emptive strike capability with enough hidden nuclear warheads to sprout mushroom clouds all across America.
