

A Geography of West Africa

(This is a geography of West Africa written specifically for GCSE syllabuses that specify West Africa. It contains maps, statistical diagrams and photographs as well as numerous exercises and GCSE type questions. It also provides a regional context for study of the major themes in all syllabuses, with an emphasis on the study of the developing world. There are two main parts to the book: the physical background and the human element. These provide a basis for the authors thematic coverage of West Africa and aim to encourage enquiry, and an appreciation of the physical, social, economic, political and spatial processes influencing the human and physical environment)
