

The Works of Victor Hugo (Classic Reprint)

Excerpt from The Works of Victor Hugo

The two most memorable barricades which the observer of social maladies can name do not belong to the period in which the action of this work is laid. These two barricades, both of them symbols. Under two different aspects, of a redoubtable situation, sprang from the earth at the time of the fatal insurrection of June, 1848, the greatest war of the streets that history has ever beheld. It sometimes happens that, even contrary to principles, even contrary to liberty, equality, and fraternity, even contrary to the universal vote, even contrary to the government, by all for all, from the depths of its anguish, of its discouragements and its destitutions. Of its darkness, that great and despairing body, the rabble, protests against, and that the populace wages battle against, the people. Beggars attack the common right; the ochlocracy rises against demos. These are melancholy days; for there is always a certain amount of night even in this madness, there is suicide in this duel, and those words which are intended to be insults - beggars, canaille, ochlocracy, and populace - exhibit, alas!
