

Defender of the Flame (The Rising Flame Book 1)

Starship pilot Terry Radnor is elated to be among those chosen to defend the secret colony Maclairn against enemies who pose a threat to the spread of paranormal human mind powers. He commits himself wholly to the goal of that world, not guessing how far his effort to protect it will take him from everything else he cares about--his promising career as a Fleet officer, his wife and soulmate, his unborn child. Torn away against his will, he is forced into exile from all that has previously mattered to him, without hope of a chance to fulfill the pledge he has made. Yet a mysterious and extraordinary destiny has been predicted for Terry, and fate leads him to an even stranger one than anybody could have imagined. This is the first book in the Rising Flame duology. Although it follows the Hidden Flame duology, Stewards of the Flame and Promise of the Flame, which tell of the founding of Maclairn two centuries earlier, it is a completely independent story that doesn't depend on having read them. Though this is not a Young Adult book and is not appropriate for middle school readers, it will be of special interest to adults and mature teens who have enjoyed Engdahl's YA novels Enchantress from the Stars and The Far Side of Evil since it deals with some of the psi powers depicted in those books and takes a similar view of humankind's place in the universe.
