

The Moonstone (Wolfmoon Trilogy Book 1)

The Moonstone, book one in the Wolfmoon trilogy, is a book about Celtic magic, gods and goddesses, druids, swords and sorcery, fantasy, romance, and mythology. Is magic gone from the world? Was it ever here? Read The Moonstone and you might just believe in magic again! Fans of strong women like those found in The Mists of Avalon series will find themselves right at home. Finnas mother is dead. So why is this woman standing on her stoop claiming to be just that? Catriona arrives bearing a gift a luminous moonstone that holds the secrets to Finnas heritage. What heritage? Catriona insists that the two of them must journey to the castle of the Celtic moon goddess, Arianrhod. Moon goddess? The story Catriona weaves is preposterous. A parallel reality, known as the Otherworld, exists next to this one. According to her, this place has no electricity, cars or any other modern conveniences. The moonstone will show the way, Catriona intones cryptically. Newly pregnant Finna is naturally skeptical. Where has this woman been for the past eighteen years? And why would her father lie about her mothers death? All her instincts tell her to stay put during this critical time. But Catriona is uncannily persuasive, convincing her despite Finnas misgivings. What a trip through this alternate reality really means, and the secrets Catriona reveals about their family and the baby Finna carries, have Finna questioning everything she has ever known. With her life and that of her unborn child in jeopardy, Finna must find a way to survive.
