

The Art of Boot and Shoemaking

From inside the book: Despite the extreme antiquity of the art of which the Author has here treated, it was not till the commencement of the present century that the first known attempt to treat of Boot and Shoemaking from a practical standpoint was made by Mr. Rees. This treatise was followed by the works of OSullivan and Devlin, that of the latter forming a portion of the series of practical works issued under the superintendence of the late Mr. Charles Knight. The art of Boot and Shoemaking may be said to have undergone a complete revolution during the past fifty years, and it is consequently impossible that works written so long since as those mentioned could satisfy the requirements of the present day. The introduction and successful application of machinery, the increased division of labour, the improved methods and instruments adopted and employed by modern craftsmen, and the use of new materials, are sufficient, besides other considerations, to justify and necessitate the production of a modern treatise on the subject. Notwithstanding the acknowledged success that has attended the employment of machinery, hand-making still retains a leading position in the Boot and Shoemaking industry; and although the number of men now employed is not equal to those formerly engaged in handwork, the status of those remaining has in no sense declined. The best class of Boots and Shoes are those made by hand for our leading bespoke masters; and it is, moreover, from the ranks of this department of the trade that the most competent machine workers are continuously recruited; therefore it is that, in the present work, the author has devoted so large a portion of the space at his command to hand-production, in which it may safely be said that the true art of the Shoemaker lies. The author will not conclude these prefatory remarks without tendering his sincere thanks to Mr. Tyrrell

for his valuable assistance. 1. Historical 2. The Anatomy of the Foot 3. The Foot: Its Ailments, and Their Remedies 4. Measurement 5. Lasts 6. Fitting Up the Last 7.
