

The Doctors Lounge: Medicine from the Inside. (Brier Hospital)

This novel will give you some insight into the minds and hearts of the people we sometimes trust with our lives. From Five Star Review: November 14, 2015 Anyone who has visited my blog knows that I love to read books by this author--I am pretty sure I have read every single one of them. I impatiently wait for his next book to be published. Doctor turned author of medical mysteries--and he has years of experience working as a physician to draw from. I also enjoy receiving the bits of medical information that he sends out--cant take the Doc out of the author!! Which is a good thing--Ive learned quite a bit by reading his blog as well. Which brings us to this novel---- Here is the question---should a doctor just sit back and watch as a patient who is in extreme pain--and absolutely nothing can be done keep that patient alive or administer enough pain medication which may or may not end his suffering permanently. It delves into DNRs and what can occur when the patient clearly has signed one but the family has objections. It also delves into the interaction (or lack thereof) between Physicians and the Administration of Hospitals. And of course the interactions between the staff members. Having worked in a hospital--believe me when I tell you--it is a bit like Peyton Place!! Then you have the old guard Doctors versus the young. What we all sometimes forget is---- Doctors are human (although some of them forget this as well) and it can happen that they need to step back because they could not see what was wrong with a patient and that patient dies. I REALLY want every one of you to read this novel--not only is it a great read--but might give you some insight into the minds and hearts of the people we sometimes trust with our lives. Jacob Weizman, the popular character first introduced in the novel, No Cure for Murder, has, after sixty years of exemplary medical practice, suffered a crisis of confidence and has

withdrawn from hospital practice. He spends mornings in the Doctors Lounge where he becomes a sage, a sounding board, consultant, adviser, and all around mentor for physicians, nurses, and even for hospital administrators. Through Jacobs involvement, we observe the realities of medical practice and how it affects practitioners and patients alike.
