These selected paragraphs distill the contents and give you a quick look inside Tolstoy on Shakespeare: Not to mention the pompous, characterless language of King Lear, the same in which all Shakespeares Kings speak, the reader, or spectator, can not conceive that a King, however old and stupid he may be, could believe the words of the vicious daughters, with whom he had passed his whole life, and not believe his favorite daughter, but curse and banish her; and therefore the spectator, or reader, can not share the feelings of the persons participating in this unnatural scene... . Lear becomes yet more exasperated and again curses Goneril, but when he is told that it was the Duke himself who ordered the stocks, he does not say anything, because, at this moment, Regan tells him that she can not receive him now and that he had best return to Goneril, and that in a months time she herself will receive him, with, however, not a hundred but fifty servants. ... Lears vacillations between pride, anger, and the hope of his daughters giving in, would be exceedingly touching if it were not spoiled by the verbose absurdities to which he gives vent, about being[24] ready to divorce himself from Regans dead mother, should Regan not be glad to receive him,-or about his calling down fen suckd frogs which he invokes, upon the head of his daughter, or about the heavens being obliged to patronize old people because they themselves are old... .
