

Waterborn (The Emerald Series Book 1)

Caris Harper lives a charmed life. Literally.

A beach... When her dad offers to take her to the Emerald Coast of Florida for summer vacation, Caris jumps at the chance to get answers to questions she's always been too afraid to ask. The chance to be normal. Isn't that what her dreams have been telling her, that here in the place of her birth she can be normal? But from the first moment the wind caresses her face and the sun touches her skin, the charm begins to fade, revealing a girl Caris never knew existed, one that is anything but normal. And the long buried Song that awakens is only the beginning of a transformation that will change her life forever. A boy.... Noah Jacobs is a waterbreather, a species of human fully adaptable to life in the water. At one time, Noah wanted to follow in his older brother's footsteps and use his abilities in service to his country. When a simple mission goes wrong and Jamie goes missing, Noah exiles himself to the Deep in a desperate search. MIA is a classification Noah is not ready to accept. But instinct can't be ignored. Not when he hears her Song. Forced to return to the one place he doesn't want to go, the girl he encounters is not what he expects and Noah is determined to get her out of his head. Instead he finds himself acting as her mentor and the more time they spend together, the more Noah realizes he just wants Caris. One summer changes everything. When a startling truth threatens their newly formed trust, Noah straddles the line between love and obsession while Caris struggles to find balance between the girl she thought she was and the young woman she wants to be.
